Eugenia,

We can accommodate the third day and store the drums for a few days if needed.

Thanks for the notice.

Enrique

**Subject:** DASS sampling next week -> questions and logistics

Enrique,

When we spoke Tierra requested that the lower HDPE and associated geo be patched and tested. Lockheed has subcontracted a specialist in this area for this part of the work.

We expect Lockheed to finish the Geoprobings on Tuesday, and these subcontractors will come in on Wednesday. However, they have indicated that may more than one day. If that is the case, a representative of LM and these subcontractors will need to be at the site on Thursday to finish up (we initially proposed 2 days (Tuesday and Wednesday). I just wanted to make you aware that this may take longer than two days.

And finally, if needed we may have to leave a couple of drums for a couple of days (maybe not), please let us know whether this is OK and if you have any other questions.

Eugenia
